HERE ARE THREE SIMPLE STEPS TO FOLLOW IN LEARNING A NEW WORD:

1. IMPRESSION

2. REPETITION

3. ASSOCIATION

IMPRESSION: Get a clear impression of the word you are trying to learn. Look at each syllable; say the word while putting the accent on the syllable, which is written in capital letters. Look at the word until you can see it with your eyes closed. See the word clearly in your mind. Write the word down as you see it in your mind with your eyes closed.

Now look at the meaning of the word. Think about the definition until it is clear to you. This way you will have a clear impression of what the word means.

REPETITION: See the word, say the word, and say the definition of the word. See the meaning of the word in your mind. See, say, and hear the word at least six times before going to the next word.

ASSOCIATION: See, say, hear, and associate the word with another word or idea that you already know. By doing this, you will burn the word and its meaning into your mind, which will give you word power.
